Location: Mymensingh, Bangladesh — Ready to Relocate to Dubai, UAE (Available Immediately)

Work Authorization: Visa Sponsorship Required

PROFESSIONAL SUMMARY

Versatile **Full-Stack & Mobile Developer** with 1.5+ years of dedicated Flutter & DRF experience and 2.5+ years of overall software development expertise, including hands-on delivery for clients across **Qatar and the wider Middle East region**. Specialised in engineering cross-platform mobile apps coupled with scalable **Django REST Framework (DRF)** backend APIs for sectors including healthcare booking, telecom/eSIM, and fintech. Proficient in designing Clean Architecture, JWT authentication, relational databases (PostgreSQL/MySQL), and async background processing with Celery/Redis. Delivered 30-35% API & app performance gains in fintech and AI systems, and shipped published apps live on the Google Play Store. **Currently based in Bangladesh; ready to relocate to Dubai, UAE for the right opportunity.**

TECHNICAL SKILLS

Frontend & Mobile:	Flutter, Dart, Kotlin, Android SDK, iOS SDK, Material Design, Cupertino, Custom Animations (Lottie/Rive)
Backend & Frameworks:	Python , Django , Django REST Framework (DRF) , RESTful API Design, Swagger/OpenAPI, Celery, Redis
State & Architecture:	BLOC, GetX, Provider, Clean Architecture, MVVM, SOLID Principles, Microservices
Auth & Databases:	PostgreSQL , MySQL, SQLite, Firestore, Hive, SQL Server, JWT Auth, OAuth2, AES Encryption
Domain Experience:	Healthcare Appointment Booking, Telecom / eSIM Connectivity, Cross-Border Remittance (Middle East ↔ Bangladesh), Payment Integration
DevOps & Tools:	Docker, Git, GitHub Actions CI/CD, Gunicorn/Nginx, AWS, Firebase, GCP, Postman
Methodologies:	Agile, Scrum, Unit Testing, Integration Testing, Code Review, Version Control (Git), Cross-Functional Collaboration

PROFESSIONAL EXPERIENCE

Full-Stack Freelance Developer (Remote) — Self-Employed	Jan 2026 – Present
- Engineered scalable backends using Django REST Framework (DRF) and integrated them with cross-platform Flutter mobile apps for international clients, including customers in Qatar and the Middle East. - Designed RESTful endpoints, implemented JWT authentication, and structured PostgreSQL database schemas ensuring zero security vulnerabilities. - Delivered a Football Live Score & Quiz platform with WebSocket updates and a DRF-powered admin scoring dashboard.	
Mobile App Developer (Flutter) — Fleek Bangladesh, Dhaka	Sep 2025 – Dec 2025

- Built cross-platform apps using Clean Architecture; integrated backend RESTful APIs with optimized JSON parsing and offline caching.
- Boosted app performance by 35% and accelerated delivery schedules by 20% through efficient Dart & API request optimization.
- Achieved 95% test coverage across unit, widget, and integration tests.

Software Engineer — SaverFavor Limited, Dhaka

Jan 2025 – May 2025

- Developed high-concurrency cross-platform applications supporting 10,000+ users leveraging MVVM & Clean Architecture.
- Collaborated with backend teams on API contract designs, securing endpoints via JWT + AES encryption and automating deployments with CI/CD pipelines.
- Mentored junior developers and reduced technical debt by 30% through strict code review standards.

IT Executive & Full Stack Developer — Bangladesh University, Dhaka

Nov 2023 – Nov 2024

- Maintained and enhanced core university web applications and student portals serving 5,000+ active users at 99.9% uptime.

KEY PROJECTS (FULL-STACK & MOBILE)

Quizen – AI-Based Quiz Competition Platform [\[Live Site\]](#)

Flutter (Mobile & Web) | DRF (Python) | PostgreSQL | 2025–2026

- Built a full-stack multi-role quiz system (Admin/Tutor/Student) handling 10,000+ users.
- Developed the backend REST API with **Django REST Framework**, utilizing PostgreSQL for dynamic scoring, user analytics, and AI-driven question generation workflows.
- Live at quizen.online with a downloadable Android build; demo credentials available on request or via portfolio.

Football Live Score & Quiz Platform

Flutter | DRF | WebSocket | Self-Initiated | 2026

- Live match tracking app with a real-time quiz layer — timed questions, leaderboard, and FCM push notifications delivered over WebSocket.
- Built a DRF-powered admin dashboard for live scoring and quiz management.
- Android build available as a direct APK; Google Play submission in progress.

DesiTransfer – Cross-Border Money Transfer App (Middle East → Bangladesh)

Flutter | DRF | JWT | AES Encryption | 2026

- Cross-border remittance solution featuring KYC onboarding, FX rate engine, and instant transfer notifications with DRF server-side logging and validation.

Finsys – Microfinance Application

Flutter (Mobile & Desktop) | Django REST Framework | SQL | 2025

- Deposit & loan tracking platform processing \$1M+ transactions; achieved 30% backend API speed gain via ORM query optimization and caching.

EDUCATION & CERTIFICATIONS

B.Sc. in Computer Science & Engineering Presidency University, Bangladesh (2023) CGPA: 3.02 / 4.00	• Google Cybersecurity Specialization (2023) • AI in Education – Finetech International (2023)
